| Project Title	Burn
Title Image	
Link to the view	https://youtu.be/oeMW2MQ--AI
This is the lunch icon after you have installed the application.	
By clicking the icon, you will launch the application and enter the first tab by default : It indicates you to input your weight, what type of exercise you have down and for how long you have down that type of exercies.	

|	
If your input weight is less than 50 lb or input time/reps is less than 1, it will toast a notification to give more instructions.	Minimum exerce should be 1 Minutes/ Reps. Minimum required weight is 50 lb.
Once you input correct information and click confirm, it will display the amount of calories you have burned and the equivalent amount of other types of exercise you need to do using visual expression. And you can scroll up and down to view all 11 types of exercises (excluding the one you selected).	CONFIRM Congratulation! You have burned 65 Calories! which is equivalent to : 13 Minutes of 6 Minutes of 7 Minutes of 65 Reps of 9 Minutes of 146 Reps of 7 Minutes of

But clicking the other tab icon you will go to the second tab. Which works in the other way : by input your weight and calories you intent to burn, it will tell you the equivalent amount of exercise you need to do (all 12 types of exercises).
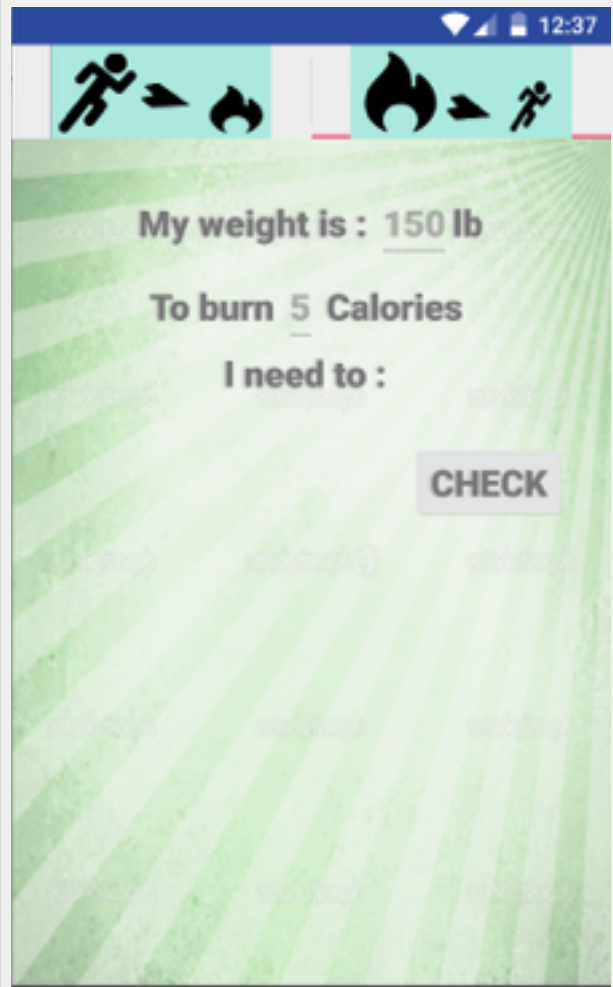

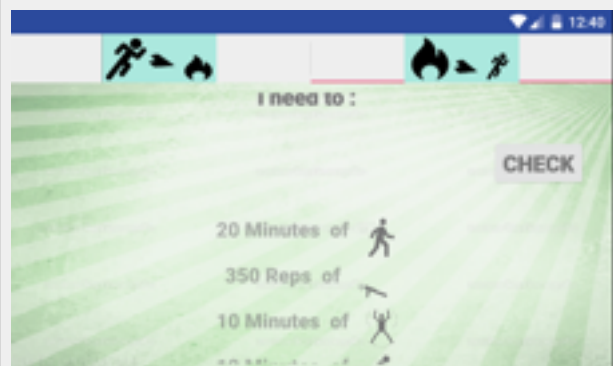

Same as the previous tab, you can scroll up and down to view exercises you need to do. One thing to notice : the exercise is calculated based on the weight of the user.	
This application also supports orientation change
